

Members Present: Thomas, Alex, Ben, and Mitch

Old Business:

- Bat Man still has not responded for Thursdays (9/21) meeting at Mead Mine
 - Shane has also not responded
 - Follow ups have been sent
- Feedback from Shane and Jared on Specs

New Business:

- Need to update project specs
 - More evenly weighted percentages
 - Need to look into weather stations to see if that is a viable spec
- Need to contact Nathan for when we are going to get specs on mine and what those specs are
- Potential backup dates for Mead Mine meeting
 - A Monday, Wednesday or Friday after lunch
- Weather Station Requirements
 - Easy to get data off of
 - Temp, humidity, wind speed
 - Maybe use an open source weather station project?

Next Steps:

- John responded during the meeting
 - Unavailable this week. He has time starting the first week of October
 - Still planning on going this Thursday to check out the outside of the cave
 - Following up with Bat Man -> Ben
- Send email to Nathan about what they are helping with - > Mitch
- Broad stroke data logger design for Thursday -> Alex
- Introductory power system research -> Thomas, Mitch
- Weather station selection and purchase request
 - May need some more research
 - Asking for Shane and Jon's opinion about Davis Weather Station
 - Thomas (Shane), Ben (Bat Man)

Notes:

- **Only referring to John as Bat Man now**
